4th MICAI Workshop in Computer Security, WSEC2010
Call for papers

Topics

The workshop will cover the full breadth and diversity of applications of AI, statistical or signal processing methods to computer security. Topics of interest include but are not limited to:

- Access control
- Intrusion detection
- Protocol verification
- Protocol repair
- Security policy specification and enforcement Information flow control.
- Web 2.0 applications

Publication

Papers will be published in English in the main proceedings of the MICAI workshop.
Authors of accepted papers will be invited to submit an extended version of their papers for a possible publication in a special issue of a journal.
We also welcome papers accepted in the MICAI conference for people interested in obtaining additional feedback and access to a specialised audience.

Submissions

We invite interested members of the scientific community to submit a ten-page paper reporting on novel, original work (possibly in progress) where artificial intelligence or a statistical method is applied to solve problems of computer security.

Submissions should be uploaded in PDF format through the **workshop submission web page** <http://www.easychair.org/conferences/?conf=wsec2010>

Paper format

Please use the LaTeX style file provided by Springer for the LLNCS series: http://www.springeronline.com/lncs. Each submission should include the names and complete addresses (including email) of all authors. Correspondence will be sent to the first author, unless otherwise indicated. All papers must be submitted in English.

Presentations

Each workshop attendee will be allocated a 25-minute slot, for a short talk to introduce his research work.

Organisers

The workshop is being organised by two research groups in computer security at Tecnológico de Monterrey, one is based in Monterrey: http://speech.mty.itesm.mx/cybersecurity and the other in Estado de Mexico: http://homepage.cem.itesm.mx/raulm/netsec

Contact

Please email wsec2010@easychair.org should you have any queries about the 2010 MICAI Workshop in Computer Security.
