Ana Preston

Ana Preston is Program Manager for the International Program of Internet2. Ana works closely with over 40 Internet2 International partner organizations and activities that include working with and leveraging the work of many of our internationally-focused members (universities, gigapop, and corporate). She also has management responsibilities for Internet2's relationship with non-US advanced networking initiatives and projects. Ana is based at the University of Tennessee (an Internet2 member university) and has worked at UT Knoxville campus) since 1999. At UT, she is a Research Consultant at the Office of Research and Information Technology, where her role is to support researchers, faculty and the academic community as they pursue the use of high performance networks. Since 1999, she has been active in the Internet2 community, representing UT in many regional and national initiatives, including chairing the first higher ed conference in the US on peer to peer technologies and currently as one of the project leads in SURA's optical networking cookbook (www.sura.org).

Ana lives in Knoxville, TN. She has a BS in Computer Science and BA's in both Film Studies and Philosophy as well as a Master Degree in Philosophy, all from the University of Kansas.
